

About this Course

Cargo that is transported commercially must be properly secured to certify the safety of the driver, employees, and motoring public. Carriers are responsible for ensuring their cargo does not shift, move, or spill onto the roadway.

Specific requirements are set in place that take precedence over the usual regulations for the proper securement of dressed lumber and any other similar building materials.

This training module is designed as a supplement course to be taken after our Cargo Securement training course. The average student will require approximately 8 minutes to complete both the course and quiz.

~8 Minutes in Duration

Course Outline

Standard Requirements

- Products Covered by the Standard
- Products Not Covered by the Standard

Securement Requirements

- Single Tier Bundles
- Side-by-Side Arrangements
- Multiple Tier Bundles
- Stakes
- Blocking/High Friction Devices
- Tiedowns
