## About this Course

Trailers come in a wide range of sizes for a variety of applications; however they all share the same common safety concerns. The improper or careless setup of a trailer can lead to a hazardous situation for you and/or others on the road.

Knowing the fundamentals for a proper setup of your vehicle and the trailer to be towed will help ensure your safety on the road.

In this second module of a two-part series, we'll take a closer look at hooking up a trailer, and how to operate a vehicle with a trailer in tow. The average student will require approximately 20 minutes to complete both the course and quiz.

Course Outline

- Hitching the Trailer
- Loading the Trailer
- Pre-Trip Inspection
- Towing the Trailer
- Unhitching the Trailer
- Storing the Trailer
- Mastery Quiz (80% to pass)

Verification Techniques Employed

✔ **Identity:** Unique usernames and passwords.

✔ **Security:** Bank-level encryption.

✔ **Certificate Verification:** Certificates contain a verification code that can be checked on MyOTF.com.
