

About this Course

Working from heights exposes a worker to the constant risk of fall hazards. Without adequate fall protection, an accident could occur and result in serious injury or death.

This introductory level course is intended for those who have not completed a basic level of hands-on fall protection training and does not replace in-depth fall protection training courses that meet regulatory requirements.

Course Outline

Introduction

Fall Protection Systems

- Fall Protection Categories
- Hierarchy of Fall Protection
- Fall Protection Plan
- Fall Protection System Evaluation

Fall Protection Equipment

- Equipment Standards
- Equipment Types
